Introduction

This qualification document describes the Design Qualification (DQ), Installation Qualification (IQ), Operation Qualification (OQ) and Performance Qualification (PQ) procedures and acceptance criteria for Mobile NAV - Warehouse Management Software Intergrated with Microsoft Business Central 23.5 at:

Astute Healthcare Ltd
Unit 1 Bilton Road
Cadwell Industrial Estate
Hitchin
Herts
SG4 0SB

The Mobile NAV- Warehouse Management Software is mainly used to scan the products and maintain inventory checks integrated with Microsoft Business Central

The document must be authorized as acceptable for use before the 31/03/2024 is used in the maintaining the warehouse inventory

Objective

To ensure that the Mobile NAV - Mobile Warehouse software has been supplied with all essential components and is fit for its intended use.

Test Details and Methodology

Tests and demos were performed and entered directly into Section 14.

Incident Occurrence, Deviation, Change Control

If any of the tests detailed in this document do not conform to the agreed specification, appropriate remedial action will be taken and fully documented.

Additional testing will undergo the following documentation:

- Free text will be recorded explaining the remedial action taken, signed / dated by the member of staff performing the action and reviewed / dated by the Responsible Person (RP).
- Relevant pages from results logs will be completed to record results for repeat tests.
- The RP will complete an additional review page to comment on and / or suggest further remedial action required.
- Authorization of an entire results log will only occur when any repeat tests have been performed and the results are considered acceptable

Acceptance Criteria

- This protocol must be approved by the Responsible Person before this test/study can begin.
- All lines, boxes, sections of this protocol must be filled in or struck through.

- Errors may be corrected manually, by an approved signatory by striking through the error and inserting the correction nearby, then initialing and dating the correction.
- Additional pages may be used throughout the protocol once they are linked back to the protocol by inserting the protocol number, the version number and the date as per the footer in the original protocol.

The section number of the additional page should also be recorded for ownership purposes.

- All temperature monitoring/mapping devices used must be calibrated to a Nationally recognized standard, to at least 3 suitable and relevant reference points with an acceptable error of less than or equal to ± 0.5 degrees C.
- Where devices are used which include cable tip ends, these tip ends should also be calibrated at that tip end.
- All calibration certificates must be valid and in date.
- Any/all out of the ordinary activities or events must be recorded as deviations.
- All documents and paperwork must be linked back to the protocol.
- Only black or blue permanent pens can be used.
- All documents must be readable in English.

Reporting and Raw Data Definition

All reported findings comprise the results directly entered on to the pages xxxx

Review and Authorization

Upon completion of all tests, the RP will review the results, highlighting any further actions required if any tests were outside the predefined criteria. Any repeat tests required will also be subject to review by a Responsible person.

Upon completion of a satisfactory qualification, the RP will sign and date the authorization signature page (cover page).

References

Appendix19,20,21 and22

Results

Purchase receipt, shipment receipt has been attached.

Report

Trial, testing and demo were done for 2 months, to check if any issue occur during purchase receipt, purchase return, sales receipt and sales return.

Deviation from Procedure

Goods in and Goods out procedure will be the same with an extra usage of WMS mobile which will be used to scan the 2D barcodes on the product. There is no deviation from the procedure

Conclusion

The WMS allows to intergrate the warehouse inventory with inventory on Microsoft Business Central 23.5. Any goods in will be sorted out batch wise and a warehouse purchase receipt would be raised. This purchase receipt will be shown on the WMS used. With the WMS products are scanned for batch and expiry date.

Authorized Signature Page

(AUTHORISATION ON COMPLETION QUALIFICATION)

I have reviewed the results of the qualification testing and confirmed that the equipment is released and authorized for use in dose preparation.

User Manual Warehouse

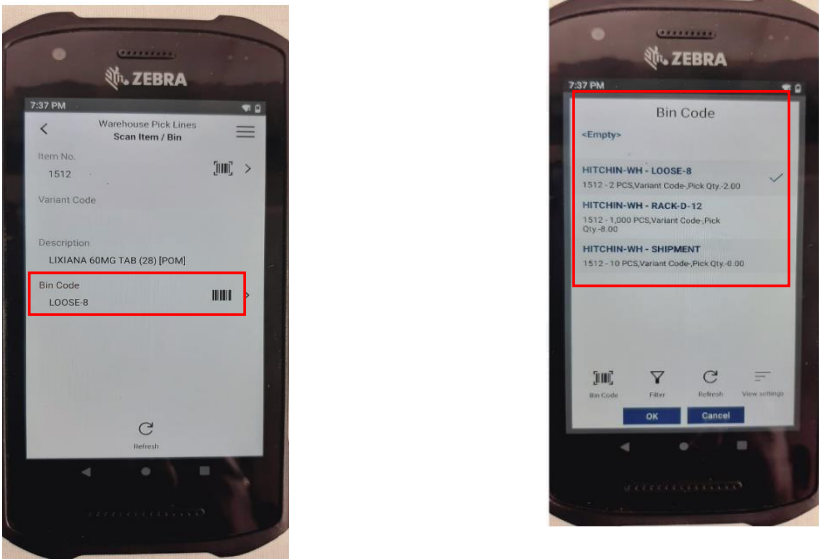

Once Warehouse Pick has been generated, open Mobile NAV Device and click Warehouse Pick. The generated pick number will appear in the list.

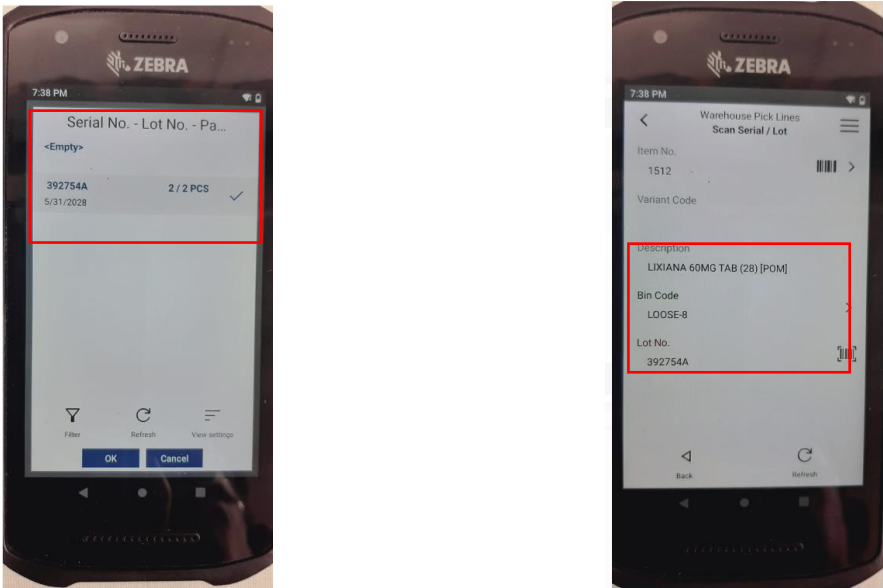

When you click on the produced pick number, the image on the left will display. Next, select "Lines" at the bottom to see the lines with the available bin quantity.

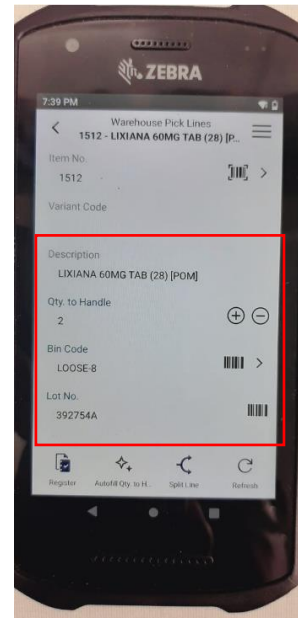

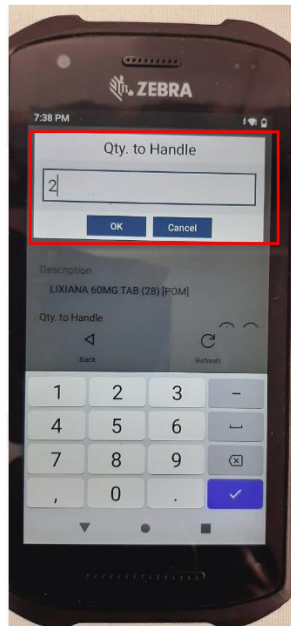

By selecting the Bin line, you can locate which Bin has the quantity that is there.

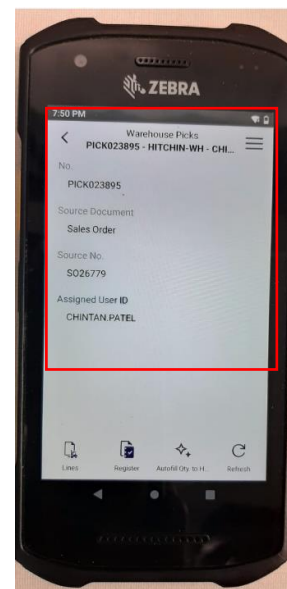

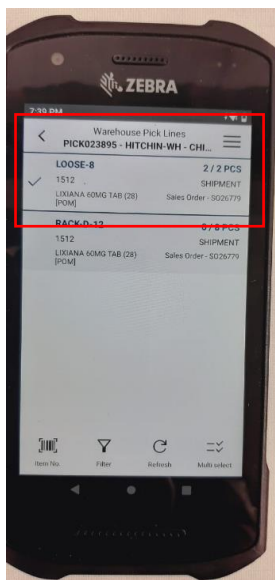

Scan the Bin and obtain the 2D barcode lot number

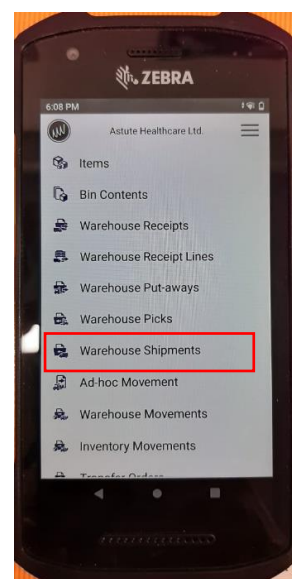

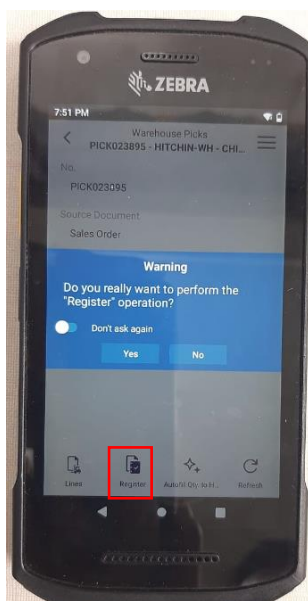

Assign the Qty.

The quantity selected will appear on the Warehouse Pick Line page after the quantity is added.

Register the Warehouse Pick Line and proceed to the Warehouse Shipment page.

The figure consists of three screenshots of a Zebra handheld device screen, showing the 'Warehouse Shipments' application. The device is a black handheld with a Zebra logo at the top.

Screenshot 1 (Top Left): The screen displays a list of warehouse shipments. The list has columns for 'HITCHIN-WH', 'Sales Order No.', and 'CHINTAN PATEL'. The shipment 'SH012829' is highlighted with a red box. Below the list, there are icons for 'No', 'More', 'Filter', 'Refresh', and 'Multi select'.

Screenshot 2 (Top Right): The screen shows a warning dialog box titled 'Warning' with the text 'Do you really want to perform the "Create Pick" operation?'. There are two buttons: 'Yes' and 'No'. Below the dialog, there is a 'Shipment Name' field and a 'Pick' button, which is highlighted with a red box.

Screenshot 3 (Bottom): The screen shows a warning dialog box titled 'Warning' with the text 'Do you really want to perform the "Post" operation?'. There are two buttons: 'Yes' and 'No'. Below the dialog, there is a 'Shipment ID' field and a 'Post' button, which is highlighted with a red box.

Once Warehouse Pick has been generated, open Mobile NAV Device and click Warehouse Pick. The generated pick number will appear in the list.

When you click on the produced pick number, the image on the left will display. Next, select "Lines" at the bottom to see the lines with the available bin quantity.

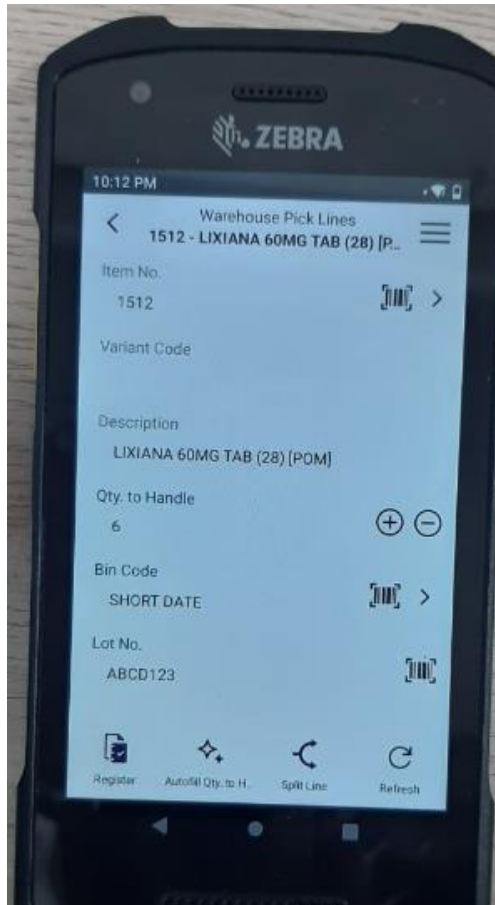

By selecting the Bin line, you can locate which Bin has the quantity that is there.

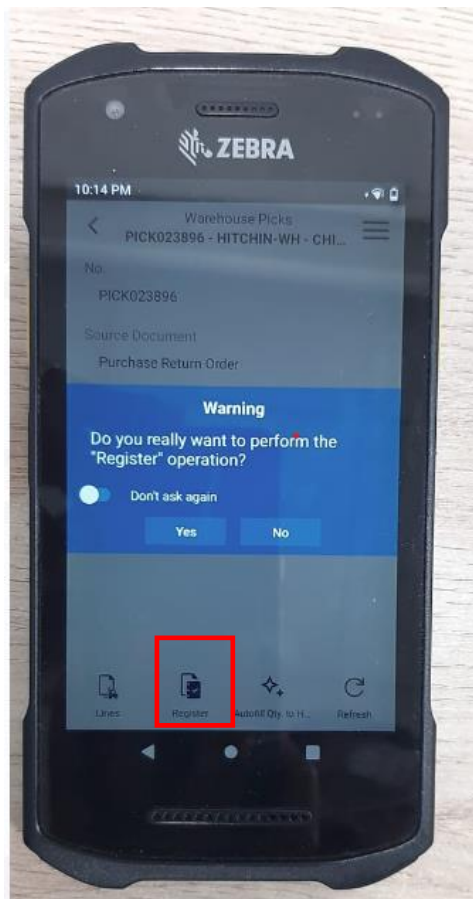

Scan the Bin and obtain the 2D barcode lot number, assign the Qty.

The quantity selected will appear on the Warehouse Pick Line page after the quantity is added.

Register the Warehouse Pick Line
